

1. Installing XAMPP

=>Go to apachefriends.org/download.html/ and download XAMPP for Windows/ 5.6.40

=>Install the Setup file.

=>Start Apache Server and MySQL.

OUTPUT:

2. Create a Registration form when user submits the form, show the information user has inserted for the confirmation using php.

Input:

Index.php

```
<html>
<head>
  <title> Registration Page </title>
  <link rel = "stylesheet" type = "text/css" href = "Style Register.css">
  <script>
    function check()
    {
      var name = document.getElementById("fname").value;
      var mail = document.getElementById("email").value;
      var id = document.getElementById("user").value;
      var passwd = document.getElementById("pass").value;
      var passwd1 = document.getElementById("pass1").value;
      if (id.length == "" && passwd.length == "" && passwd1.length == ""
&& name.length == "" && mail.length == "")
      {
        alert("Fill All The Fields.");
        return false;
      }
      else
      {
        {
          if (passwd != passwd1)
          {
            alert("Password In Confirm Password Field Didn't Matched With Password Field.");
            return false;
          }
          if (id.length == "")
          {
            alert("Kindly Enter User Name.");
            return false;
          }
          if (passwd.length == "")
          {
            alert("Kindly Enter Password.");
            return false;
          }
        }
      }
    }
  </script>

```

[illegible]

Data.php

```
<html>
