```
#1. Write python program that takes list of integers as per requirement and
returns the sum of the list ,total number integers entered by user.

list = []
count=0
sum = 0
n = int(input('Do you want to give input [Yes(1) / No(0)]: '))
if n == 1:
    num = int(input('Please enter integers, and if you wish to stop then
just type "0": '))
    list.append(num)
    while (num != 0):
        num = int(input())
        list.append(num)
else:
    print("You have total 0 integer(s) and total of 0 sum.")

list.pop(-1)

print('Your list: - ',list)

for i in list:
    count += 1

for j in list:
    sum += j

print('You have total {0} integer(s) and total {1} sum.'.format(count,sum))
```

Output:

import sys; print('Python %s on %s' % (sys.version, sys.platform))

sys.path.extend(['D:\\CODING\\PYTHON', 'D:/CODING/PYTHON'])

PyDev console: starting.

Python 3.9.4 (tags/v3.9.4:1f2e308, Apr 6 2021, 13:40:21) [MSC v.1928 64 bit (AMD64)] on win32

runfile('D:/CODING/PYTHON/venv/program12.py', wdir='D:/CODING/PYTHON/venv')

Do you want to give input [Yes(1) / No(0)]: >? 1

Please enter integers, and if you wish to stop then just type "0": >? 1

2

3

4

5

6

7

0

Your list: - [1, 2, 3, 4, 5, 6, 7]

You have total 7 integer(s) and total 28 sum.

```
#2. Write a Python program which accepts a sequence of comma separated 4
digit binary numbers as its input and print the numbers that are divisible
by 5 in a comma separated sequence.

items = []
```

```
print('Please enter the binary numbers using "," to split then(like
0100,1100,0110): ')
num = [x for x in input().split(',')]
for p in num:
    x = int(p, 2)
    if not x%5:
        items.append(p)
print('The numbers divisible by 5 are: ')
print(','.join(items))
```

Output:

import sys; print('Python %s on %s' % (sys.version, sys.platform))

sys.path.extend(['D:\\CODING\\PYTHON', 'D:/CODING/PYTHON'])

PyDev console: starting.

Python 3.9.4 (tags/v3.9.4:1f2e308, Apr 6 2021, 13:40:21) [MSC v.1928 64 bit (AMD64)] on win32

runfile('D:/CODING/PYTHON/venv/program12.py', wdir='D:/CODING/PYTHON/venv')

Please enter the binary numbers using "," to split then(like 0100,1100,0110):

1010,0101,1010,0011,1100

The numbers divisible by 5 are:

1010,0101,1010

```
#3. Write a Python program to construct the following pattern, using a
nested loop number.

n = int(input("Please enter number of rows: "))

for i in range(1,n+1):
    for j in range(1, i+1):
```

```
        print(i, end="")
    print()
```

Output:

import sys; print('Python %s on %s' % (sys.version, sys.platform))

sys.path.extend(['D:\\CODING\\PYTHON', 'D:/CODING/PYTHON'])

PyDev console: starting.

Python 3.9.4 (tags/v3.9.4:1f2e308, Apr 6 2021, 13:40:21) [MSC v.1928 64 bit (AMD64)] on win32

runfile('D:/CODING/PYTHON/venv/program12.py', wdir='D:/CODING/PYTHON/venv')

Please enter number of rows: >? 7

1

22

333

4444

55555

666666

7777777

```
#4. Python program to display numbers from 20 to 26 and break the loop when
a number about to display is 5.

for i in range(20,27):
    if (i == 25):
        continue
    print(i)
    i+=1
```

Output:

import sys; print('Python %s on %s' % (sys.version, sys.platform))

sys.path.extend(['D:\\CODING\\PYTHON', 'D:/CODING/PYTHON'])

PyDev console: starting.

Python 3.9.4 (tags/v3.9.4:1f2e308, Apr 6 2021, 13:40:21) [MSC v.1928 64 bit (AMD64)] on win32

runfile('D:/CODING/PYTHON/venv/program12.py', wdir='D:/CODING/PYTHON/venv')
